1. Newly submitted claims 7-16 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The method described in claims 1-6 can be used to produce a materially different scaffold structure such as one having a thickness which lies outside of the range of claim 7 (it is noted by the examiner that claims 7-16 are regarded as "newly submitted" because the preliminary amendment filed January 20, 2004 canceled claims 7-16).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-16 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chun et al. (6,423,252) as set forth in the previous Office action.

4. Applicants' arguments filed October 2, 2006 have been fully considered but they are not persuasive. Applicants argue that Chun et al. is not prior art to their patent application. Applicants note that this application is a divisional of US 6,712,850, which has a filing date of November 30, 2001, while the Chun et al. patent published on July

Art Unit: 1732

23, 2002. This is not persuasive because the Chun et al. patent would still be applicable prior art under 102(e)/103, based on the record before the examiner.

5.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on (571) 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
